

Api Quickstart

Placeholder for PDF source: SupportFlow API Quickstart

Source ID: api-quickstart-pdf-placeholder

This text file represents a lightweight PDF source for portfolio ingestion tests.

Quickstart steps:

1. Create an API key from Admin Settings > Developer Access.
2. Store the key in a server-side secret manager.
3. Send POST /v1/conversations with customer_id, subject, body, channel, and idempotency_key.
4. Store the returned conversation_id for future status checks.
5. Configure webhooks for conversation.created and conversation.updated.

Security note:

Never expose SupportFlow API keys in browser code, mobile clients, public repositories, or customer-visib
