

Access Review Checklist

Placeholder for PDF source: Quarterly Access Review Checklist

Source ID: ops-access-review-checklist

This text file represents a lightweight PDF source for ingestion tests.

Checklist:

- Export current users by role.
- Confirm every Support Admin still needs admin access.
- Confirm API key owners are active team members.
- Remove users who no longer handle SupportFlow inquiries.
- Verify Read Only Analysts cannot reply or change inquiry state.
- Review recent export events for unusual access patterns.
- Record completion in the audit log.

Completion rule:

Access review is complete only when all exceptions have an owner role and due date.
